# MOELLER STONE CARE

## PRODUCT SPECIFICATION

### **HMK® R771 - FAÇADE CLEANER - acid based** FOR PROFESSIONAL USE

- removing extremely persistent atmospheric deposits, oily soot, water marks and mineralization
- use on rough granite, gneiss and sandstone façades

HMK® R771 is a special acid based concentrated cleaner for removing extremely persistent atmospheric deposits, oily soot, water marks and mineralization from rough granite, gneiss and sandstone façades. For external use only.

**Instructions:** Ensure all adjacent surfaces are protected against spills. Always mix solution where spills can do no damage. Work on manageable areas at a time. Before application wet the surface to be treated and apply the mixture diluted 1:3 to 1:5 depending on the level of contamination, with a scrubbing brush, stiff brush or a suitable pad. Work into the surface and leave for a short time but do not allow to dry. Scrub the area again and remove the dirty liquid. Afterwards clean the area thoroughly using HMK® R155 Intensive Cleaner - acid free diluted with clean water (about 1:10) and remove the dirty liquid. Afterwards rinse the area thoroughly with clean water. Repeat the procedure in the case of very strong contamination.

**Note:** Do not apply in direct sunlight. Acid sensitive surfaces, polished natural and artificial stones, metals, plastics, glass etc... will be damaged by contact with HMK® R771.

**Coverage:** About 10-80m<sup>2</sup>/litre.

**Warning:** Chemical product. Contains phosphoric and hydrochloric acids. Corrosive. Avoid eye/skin contact. If exposed, wash/flush with water, and seek medical attention. Reacts with metals. Follow appropriate safety precautions when dealing with corrosives. At all times wear suitable protective clothing (gloves, masks, boots, etc...). Keep out of the reach of children. See Material Safety Data Sheet for more detailed information.

**Packaging:** 2 x 10 litre cans/box.

**Storage:** Store in cool place. Keep lid tightly closed.

**Testing:** As HMK® R771 is highly acidic it is essential to always test the product in an inconspicuous area to evaluate suitability, coverage and performance. Do not use the product in temperatures below 12° and above 25°C.

**Limitation of liability:** The liability of HMK® Moeller Stone Care for defective products and any claims for damages whatsoever is limited to the purchase price of the products. HMK® Moeller Stone Care shall not be liable for any consequential damages. No other warranty or representation is made or implied.
